SALES ANALYSIS

Glossary & Definitions

Understanding the metrics, terminology and visualisations used in this report.

Business Terminology

Term	Definition
Total Revenue	The total monetary value generated from sales during the selected period.
Transactions	The number of recorded customer purchases or sales transactions.
Average Order Value (AOV)	Total revenue divided by the number of transactions.
Product Performance	An assessment of how individual products contribute to revenue or sales volume.
Sales Trend	The movement of sales or revenue over time.
Sales Volume	The quantity of products sold during a selected period.
Product Category	A grouping of products based on their type or classification.
Filter / Slicer	An interactive control that limits the data displayed by selected criteria.
Quarter-on-Quarter Change	The percentage change in a measure between two consecutive quarters.

Visualisation Guide

This section explains the purpose of each visual in the report and what it helps you understand.

Revenue Trend (Line Chart)

Shows how revenue changes over time. Helps identify peak periods, dips and overall growth.

Product Performance (Bar Chart)

Compares products by revenue or quantity sold. Highlights top and underperforming items.

Category Comparison (Donut/Pie Chart)

Shows the contribution of each product category to total sales. Helps identify which categories are the biggest revenue drivers.

Transaction or Quantity (Column Chart)

Displays the number of transactions or units sold. Shows customer purchasing behaviour.

Detailed Sales Table

Lists the individual sales records, including date, product, quantity and revenue. Provides the detail behind the summary charts.

Date and Product Slicers

Allow you to filter the data by date range, product or category. Helps you explore specific time periods or product performance.

Drill-Through

Lets you right-click a data point to open a detailed view for that product, category or period.

Key Metrics Cards

Show important numbers such as total revenue, transactions, AOV and growth. Give a quick overview of overall performance.
