BRIGHT
COFFEE SHOP

PROJECT DESCRIPTION
Jan - Jun 2023

SALES PERFORMANCE & PRODUCT INSIGHTS

Brewing insight from every cup sold.

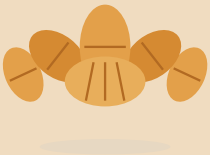

A data project that turns 149,116 transactions across three New York stores into clear decisions on products, peak hours and growth.

Coffee
$269,952 sold

Tea
$196,406 sold

Bakery
$82,316 sold

Drinking Chocolate
$72,416 sold

Coffee beans
$40,085 sold

Branded
$13,607 sold

Loose Tea
$11,214 sold

Flavours
$8,409 sold

Packaged Chocolate
$4,408 sold

01 THE PROJECT

What this project is about

Bright Coffee Shop operates three stores in New York City - Lower Manhattan, Hell's Kitchen and Astoria. Every sale is recorded by date, time of day, store, product category, product type and product. This project consolidates six months of that sales data into one analysis workbook with pivot tables and an interactive dashboard, so the team can see what sells, when it sells and where.

$698,812	214,470	149,116	3	80
Total revenue	Units sold	Sales recorded	Store locations	Products sold

Objectives

- Identify the best-selling product categories and types.
- Find the peak trading times: morning, afternoon, evening and weekday vs. weekend.
- Compare the three stores and track monthly growth.
- Give the shop clear, visual evidence for menu, staffing and stock decisions.

Scope of the data

Period	1 January - 30 June 2023
Records	61,078 daily sales rows
Stores	Lower Manhattan, Hell's Kitchen, Astoria
Menu	9 categories, 29 types, 80 products
Time bands	Morning, Afternoon, Evening
Day types	Weekday and Weekend

Deliverables inside the workbook

1 Cleaned dataset

61,078 rows with calculated fields: revenue, price range, quarter, day and time class.

2 13 pivot tables

Revenue by month, store, category, product type, time of day and day.

3 Interactive dashboard

Charts with slicers to filter by store, category and period.

Approach

1 Collect → 2 Clean → 3 Calculate → 4 Pivot → 5 Visualise → 6 Recommend

02 WHAT BRIGHT SELLS

The product range in the data

Only products that appear in the sales records are shown. Each card lists its share of total revenue, the number of product types and the individual items sold.

Coffee 39%

$269,952 | 89,250 units

5 types | 21 items

Top: Barista Espresso, Gourmet brewed coffee, Premium brewed coffee

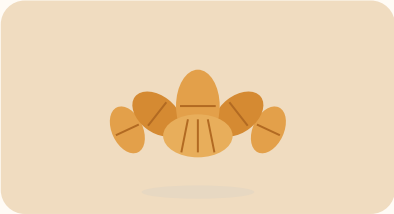

Tea 28%

$196,406 | 69,737 units

4 types | 16 items

Top: Brewed Chai tea, Brewed Black tea, Brewed herbal tea

Bakery 12%

$82,316 | 23,214 units

3 types | 11 items

Top: Scone, Pastry, Biscotti

Drinking Chocolate 10%

$72,416 | 17,457 units

1 type | 4 items

Top: Hot chocolate

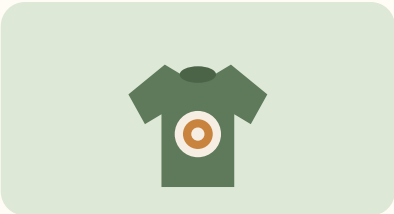

Coffee beans 6%

$40,085 | 1,828 units

6 types | 10 items

Top: Premium Beans, Organic Beans, Gourmet Beans

Branded 2%

$13,607 | 776 units

2 types | 3 items

Top: Housewares, Clothing

Loose Tea 2%

$11,214 | 1,210 units

03 WHAT THE DATA SHOWS

Early insights from the analysis

Monthly revenue

Revenue more than doubled from January to June

When customers buy

Share of revenue by time of day

Morning 56%

Afternoon 35%

Evening 9%

Weekday vs weekend

Weekday 72% | Weekend 28%

Revenue by product category

Coffee	$269,952
Tea	$196,406
Bakery	$82,316
Drinking Chocolate	$72,416
Coffee beans	$40,085
Branded	$13,607
Loose Tea	$11,214
Flavours	$8,409
Packaged Chocolate	$4,408

Store performance

Hell's Kitchen	$236,511	34%
Astoria	$232,244	33%
Lower Manhattan	$230,057	33%

04 WHERE WE GO NEXT

Recommendations and next steps

Lead with coffee and tea

Coffee and tea together bring in $466,358 (67% of revenue). Keep them front and centre on menus and signage.

Staff and stock for the morning rush

Mornings generate 56% of sales. Prioritise barista cover and bakery stock before midday.

Grow the shelf-stable range

Coffee beans average about $22 per sale and Branded items about $18, far above a $4-5 drink. Promote them as add-ons at the till.

Protect the winning momentum

Revenue climbed from $81,678 in January to $166,486 in Jun. Use the dashboard monthly to spot what drives growth.

Keep the three stores in balance

Stores are within 3% of each other, so promotions can be rolled out chain-wide and tested once.

Next steps

Validate
Confirm figures with store managers

Extend
Add more months and customer data

Automate
Refresh the dashboard every month

Act
Pilot menu and staffing changes
